## OPTIONS AND PARTS AVAILABLE FOR TEST STATIONS

- Key wrench for operation of locking covers to open both locking and non-locking covers.
- Additional terminals on terminal boards.
- Shorting straps between terminals.
- Lightning gap arrestors.
- Pre-wired test stations with all types of wire gauges, colors, lengths and connectors... including 5-way binding posts.
- Adjustable test stations with separate plastic top and bottom sections.
- Custom lettering cast into cover.
- Covers painted colors other than standard yellow.

## EXCLUSIVE FEATURES

- Heavy-duty cast iron cover and collar, exceeding ASTM-A-48 Class 25... many passing DOT H-20 Roadway and/or FAA runway loading test. We will certify Made in the U.S.A.
- High quality, strong and durable ABS (acrylonitrile butadiene styrene) plastic shafts, exceeding ASTM D-1788.
- PVC (polyvinyl chloride) terminal boards. Terminal boards prolong wire life by minimizing wire strain and movement.
- Terminals are 1/4"-20" threaded stainless steel machine screws with nuts, resists corrosion for long life.
- Non-conductive plastic construction eliminates electrolytic and galvanic action to ensure accurate test readings.
- Flared plastic shaft makes test station self-leveling during installation and keeps lead wires protected.

## CP TEST & VALVCO, INC.

### **We manufacture a broad line of products including:**

- Valve boxes for gas and water utilities
